Abstracts

The global Roof Coating market size is expected to reach \$ 2587 million by 2032, rising at a market growth of 2.9% CAGR during the forecast period (2026-2032).

In 2025, global roofing coating production reached 4.4279 million tons, with an average selling price of US\$465 per ton.

Roofing coatings were developed to address issues such as roof leakage, poor weather resistance, inadequate thermal insulation, and high maintenance costs. Since the maturity of modern architectural coating technology in the mid-20th century, the roofing coating industry has experienced significant growth. Currently, roofing coatings encompass various types, including water-based acrylic, silicone, and fluorocarbon, and are widely used in residential buildings, commercial buildings, industrial plants, and public facilities, providing multiple functions such as waterproofing, thermal insulation, corrosion protection, and decoration.

Currently, there are many producing companies in the world. The main market players are AkzoNobel, PPG, Sherwin-Williams, RPM, BASF SE, Nippon, Dow, Gardner-Gibson, Kansai Paint and Hempel A/S, etc, with about 75% market shares. North America is the largest production of Roof Coating, with a Revenue market share nearly 50%. The second place is Europe, following North America with the Revenue market share over 25%. China is another important production market of Roof Coating.
