Abstracts

The global Roof Windows market size is expected to reach \$ 3781 million by 2032, rising at a market growth of 3.7% CAGR during the forecast period (2026-2032).

A roof window is an outward opening window that is incorporated as part of the design of a roof. Often confused with a skylight, a roof window differs in a few basic ways. A roof window is often a good option when there is a desire to allow both light and fresh air into the space.

A roof window tends to be larger than a skylight, making it possible to enjoy a wider view of the sky overhead. In addition, skylights are usually stationary; that is, they cannot be opened and closed. With some designs of a roof window, it is possible to retract a portion of the glazed panes to allow in fresh air as well as enjoy the natural light.

Global Roof Windows key players include Velux, Fakro, Roto, etc. Global top three manufacturers hold a share over 80%.

Western Europe is the largest market, with a share over 50%, followed by Eastern Europe, and North America, both have a share about 40 percent.

In terms of product, Wood is the largest segment, with a share over 60%. And in terms of application, the largest application is Residential, followed by Commercial.

This report studies the global Roof Windows production, demand, key manufacturers, and key regions.
