Abstracts

The global Rosin Resin Air Entraining Agent market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Rosin resin air entraining agents are mainly rosin soap and rosin thermopolymer. The production of rosin soap is simple and the price is low, but the induced bubbles are large and unstable, the strength of concrete is greatly reduced, the solubility is poor, and the compoundability with other admixtures is poor. Rosin thermal polymers have high air-entraining efficiency and small dosage, but due to different degree of polymerization reaction, the quality of air-entraining agent and air-entraining bubbles varies greatly.

This report studies the global Rosin Resin Air Entraining Agent production, demand, key manufacturers, and key regions.
