Abstracts

The global Rotary Limit Switch market size is expected to reach \$ 73.88 million by 2032, rising at a market growth of 3.3% CAGR during the forecast period (2026-2032).

The rotary limit switch is used to control the movement of industrial machinery. It operates as an auxiliary controller of electrical motors through a power interface, such as a contactor or PLC. Suitable for heavy duty, its shaft is connected to the motor and, after a set number of revolution, the cams operate the switches, thus starting the predetermined movement. A worm gear and a helical toothed gear combined with one or more pairs of straight toothed gears are used for the transmission of the movement from the input shaft to the output shaft.

Global Rotary Limit Switch key players include Stromag, Tecno Elettrica Ravasi (TER), AMETEK STC, Gleason Reel (Hubbell), Giovenzana, etc. Global top five manufacturers hold a share about 70%. Europe is the largest market, with a share about 70%, followed by North America, with a share about 20 percent. In terms of product, SPDT Switches Type is the largest segment, with a share about 60%. And in terms of application, the largest application is Hoisting Apparatus, followed by Wind Turbines.
