Abstracts

According to our (Global Info Research) latest study, the global Rotary Steering System market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes. Rotary Steerable System (RSS) is a type of drilling tool used in the oil and gas industry to control the direction of a drilling well. The RSS uses a combination of rotary motion and hydraulic pressure to steer the drill bit in a specific direction, allowing for more precise and efficient drilling. Unlike traditional drilling methods, which require the drill string to be rotated to steer the drill bit, the RSS rotates the bit and steers it simultaneously, reducing the need for multiple trips in and out of the well.
