Abstracts

According to our (Global Info Research) latest study, the global Rotary Valve Actuator market size was valued at US\$ 1481 million in 2024 and is forecast to a readjusted size of USD 1693 million by 2031 with a CAGR of 2.0% during review period.

A rotary actuator is an actuator that produces a rotary motion or torque. The simplest actuator is purely mechanical, where linear motion in one direction gives rise to rotation. The most common actuators though are electrically powered. Other actuators may be powered by pneumatic or hydraulic power, or may use energy stored internally through springs.

The motion produced by an actuator may be either continuous rotation, as for an electric motor, or movement to a fixed angular position as for servomotors and stepper motors. A further form, the torque motor, does not necessarily produce any rotation but merely generates a precise torque which then either causes rotation, or is balanced by some opposing torque.

Global Rotary Valve Actuator key players include Honeywell, Rotork, Siemens, AUMA, etc. Global top four manufacturers hold a share about 55%.

Europe is the largest market, with a share about 40%, followed by Europe and China, have a share about 45 percent.

In terms of product, Pneumatic is the largest segment, with a share about 40%. And in terms of application, the largest application is Chemical and Petrochemical, followed by Food & Beverages, Oil & Gas, Water and Waste Water Treatment, etc.
