The rotary die cutting machine is a type of cutting machine commonly used in mass production, especially in the manufacture of corrugated cardboard and cartons. Generally speaking, circular die cutting machines are divided into two cutting methods: hard cutting and soft cutting. The hard cutting method refers to the hard contact between the die cutter and the surface of the pressure roller during die cutting, while the soft cutting method is to cover the surface of the pressure cutting drum with a layer of engineering plastic (rubber pad). During die cutting, the cutter can cut into The amount can not only protect the cutter, but also ensure complete cutting.
