According to our (Global Info Research) latest study, the global RTK Positioning Terminal market size was valued at US\$ 1154 million in 2024 and is forecast to a readjusted size of USD 1893 million by 2031 with a CAGR of 7.4% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

RTK is a high-precision positioning technology based on satellite navigation systems (such as GPS, Beidou, etc.), which uses differential methods to achieve real-time centimeter-level positioning. Its basic principle is to set up a base station (reference station) at a known location to receive satellite signals and calculate the satellite positioning error of that location. Then, these errors are transmitted to the mobile terminal (rover) in real time through wireless communication, enabling accurate real-time positioning.

This report is a detailed and comprehensive analysis for global RTK Positioning Terminal market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application.
