Rubber Crossing Panels are modular, heavy-duty rubber components designed to provide a smooth, durable, and safe surface for vehicular and pedestrian traffic at railroad grade crossings. These panels are typically installed between and alongside railroad tracks, aligning flush with the rail to minimize gaps and reduce tripping or vehicle hazards. Made from recycled or virgin rubber, they offer resilience, weather resistance, and noise-dampening qualities. Their modular nature allows for easy installation, removal, and replacement, making them a practical and environmentally friendly choice for maintaining safe railroad crossings.
