According to our (Global Info Research) latest study, the global Rubber market size was valued at USD 47960 million in 2023 and is forecast to a readjusted size of USD 80380 million by 2030 with a CAGR of 7.7% during review period.

Natural rubber, also called India rubber or caoutchouc, as initially produced, consists of polymers of the organic compound isoprene, with minor impurities of other organic compounds plus water. Natural rubber is the prototype of all elastomers. The rubber is collected from the latex in a series of steps involving preservation, concentration, coagulation, dewatering, drying, cleaning, and blending. Because of its natural derivation, it is sold in a variety of grades based on purity (color and presence of extraneous matter), viscosity, viscosity stability, oxidation resistance, and rate of cure.

Global Rubber key players include Von Bundit, Sri Trang Agro-Industry, Southland Holding, Thai Hua Rubber, Vietnam Rubber, etc. Global top five manufacturers hold a share over 20%. China is the largest market, with a share over 30%, followed by Europe and USA, both have a share over 20% percent.

In terms of product, Technically Specified Rubber (TSR) is the largest segment, with a share over 40%. And in terms of application, the largest application is Automotive, followed by Medical and Industrial.
