Abstracts

The global Running Sports Insurance market size is expected to reach \$ 33409 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

Running sports insurance is a specialized sports insurance product designed specifically for runners. It covers various risks that may occur during running, such as sports injuries, sudden cardiovascular events, third-party liability, losses from race cancellation or postponement, medical expenses, and accidental death or disability during the race. Compared to general accident insurance, running insurance emphasizes 'scenario-based risk modeling,' typically integrating with race organizers, marathon events, sports apps, or wearable devices. It uses dynamic health data for risk assessment, thus evolving from a traditional insurance product into a 'sports health risk management tool,' forming an independent sub-segment within the mass fitness and professional sports systems.

From an industry perspective, running sports insurance is currently benefiting from the global boom in 'mass fitness + endurance sports.' With the rapid global expansion of endurance events such as marathons, triathlons, and trail running, the participation has expanded from professional athletes to ordinary urban middle-class individuals. Running has become one of the most participated sports globally, directly driving a significant increase in demand for sports injury insurance. Meanwhile, insurance companies are integrating running insurance with the digital health ecosystem. For example, they are using smartwatches and fitness apps to collect exercise data, enabling dynamic pricing based on risk, and linking sales to race registration systems to improve conversion rates. Future growth will primarily come from three areas: first, the accelerated commercialization of global marathons and endurance events; second,

rising health management spending by the middle class; and third, the integration of sports technology and insurance. Overall, running insurance will upgrade from a 'race supplementary insurance' to a 'long-term sports and health protection subscription service,' extending to year-round sports risk management.
