According to our (Global Info Research) latest study, the global Runway Center-line Light market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The runway centerline lighting system consists of a single light installed at uniform intervals along the runway centerline to provide a continuous lighting reference from threshold to threshold. Runway centre line lights together with markings are the primary visual cues used by pilots for visual and directional guidance during landing, roll-out and take-off. In addition, runway centre line lights allow pilots to estimate the distance from the end of the runway through the colour of the lights.
