Runway terminal marker lights are a key component of the airport navigation lighting system. They are mainly used to clearly indicate the end of the runway to pilots at night or in low visibility conditions, helping pilots identify and locate the correct direction of the runway during takeoff and landing. These lights are usually installed at each end of the runway, with a pair of lights at each end, located on the extension of the runway centerline and at a certain distance from the runway centerline. The runway terminal marker lights will emit synchronized flashing lights to distinguish them from other runway lights, thereby providing a clear visual reference.
