The global RV Refrigerator market size is expected to reach \$ 2241 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

RV refrigerator is a refrigerator that can be used in a car to keep food and other items at low temperature. In 2025, global RV Refrigerator production reached approximately 3423 k units, with an average global market price of around 400 US\$/Unit. The production capacity of RV Refrigerator reaches 4278 k units, and the industry's gross profit margin is approximately between 20% and 40%.

The demand for RV refrigerators continues to grow, mainly driven by multiple factors such as the rise of global RV tourism and self-driving camping, consumers' increasing demands for the quality of travel and living, the popularization of new energy RVs driving the demand for high-efficiency electric refrigeration equipment, and the evolution of outdoor lifestyles towards family-oriented and long-term use. At the same time, technological advancements have enabled compressor refrigerators to continuously optimize in terms of energy efficiency, quietness, and shock resistance, further promoting their replacement of traditional absorption refrigerators and expanding their application in the mid-to-high-end RV and modification market.

This report studies the global RV Refrigerator production, demand, key manufacturers, and key regions.
