According to our (Global Info Research) latest study, the global S-band Duplexer market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A duplexer, also known as an antenna duplexer, can be regarded as a relatively special bidirectional three-terminal filter. Duplexers are mainly used in FDD (Frequency Division Duplex) format channels on mobile phone motherboards. Their function is to isolate transmitting and receiving signals to ensure that both receiving and transmitting can work normally at the same time. A duplexer can be called a 'Duplexer' or a 'Diplexer', but the former represents the function of transmitting and receiving isolation, while the latter represents the function of multi-band frequency band switching.
