## Abstracts

According to our (Global Info Research) latest study, the global (S)-Equol market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

(S)-Equol is a more potent phytoestrogen derived from the transformation of soy isoflavones by gut microbiota. It has a stronger affinity for estrogen receptors and possesses various potential biological activities, including antioxidant effects, immune modulation, alleviation of menopausal symptoms, and benefits for bone and cardiovascular health. It is commonly used in health supplements, cosmetics, and pharmaceuticals.

The core raw material is daidzein, extracted from soybeans, and the process also involves the selection and breeding of special microorganisms (such as lactic acid bacteria and bifidobacteria). Downstream applications are highly concentrated in the health consumer sector, mainly covering dietary supplements for menopausal health, cosmeceutical products focused on skin anti-aging, and pharmaceutical research and development.

Global sales in 2025 are projected to be approximately 900 kilograms, with an average market price of around \$6,000 per kilogram. Industry gross profit margins are expected to be in the range of 15%?30%.

(S)-Equol is considered a substance with the potential to redefine the standards of women's health supplements, particularly due to its advantages in regulating hormonal balance and managing menopausal symptoms, which are gradually being recognized by consumers and supported by some scientific evidence. Its naturally derived hormone-

like effects make it more appealing in the health supplement market than traditional synthetic hormone replacement therapies.

The industry's driving factors stem primarily from consumers' increasing preference for natural, functional health products. The global nutraceutical and natural products market is already on an upward trend, with hormone balance and women's health being among the fastest-growing segments. (S)-Equol, as a metabolite of soy isoflavones, fits this trend due to its specific natural and active characteristics, which has driven manufacturers and brands to incorporate it into nutritional supplements, functional foods, and pharmaceutical formulations.

This report is a detailed and comprehensive analysis for global (S)-Equol market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

### **Key Features:**

Global (S)-Equol market size and forecasts, in consumption value (\$ Million), sales quantity (kg), and average selling prices (US\$/kg), 2021-2032

Global (S)-Equol market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (kg), and average selling prices (US\$/kg), 2021-2032

Global (S)-Equol market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (kg), and average selling prices (US\$/kg), 2021-2032

Global (S)-Equol market shares of main players, shipments in revenue (\$ Million), sales quantity (kg), and ASP (US\$/kg), 2021-2026

### **The Primary Objectives in This Report Are:**

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for (S)-Equol

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global (S)-Equol market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Otsuka Pharmaceutical, Daicel Corporation, Bonerge Lifescience, Anthem Biosciences, Shanghai EGT Synbio, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

## **Market Segmentation**

(S)-Equol market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

## Contents

### 1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global (S)-Equol Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 Purity?99%

1.3.3 Purity

## List Of Tables

### LIST OF TABLES
