## Abstracts

The global SaaS-Based Expense Management market size is expected to reach \$ 5577 million by 2032, rising at a market growth of 7.7% CAGR during the forecast period (2026-2032).

SaaS-based expense management includes the deployment of expense management systems as a web-based subscription service. This system helps in controlling and monitoring expense reports, thereby streamlining the business process and preventing fraud and human error. It also increases visibility across the entire reimbursement claim process, reducing travel costs and improving the efficiency of enterprises.

The SaaS-based system is operated by a third-party organization as opposed to the installation and maintenance of an on-site business system. SaaS-based expense management has succeeded in changing the procurement of expense management systems from a capital expenditure to a pay-per-use subscription arrangement.

The global SaaS-Based Expense Management top three players include Concur Technologies, SAP Ariba and IBM, with about 66% market shares. North America is the largest consumption place, with a consumption market share nearly 39%. Following North America, Europe is the second largest consumption place with the consumption market share of 24%.
