According to our (Global Info Research) latest study, the global SaaS-Based Expense Management market size was valued at US\$ 3112 million in 2024 and is forecast to a readjusted size of USD 5207 million by 2031 with a CAGR of 7.7% during review period.

SaaS-based expense management includes the deployment of expense management systems as a web-based subscription service. This system helps in controlling and monitoring expense reports, thereby streamlining the business process and preventing fraud and human error. It also increases visibility across the entire reimbursement claim process, reducing travel costs and improving the efficiency of enterprises.

The SaaS-based system is operated by a third-party organization as opposed to the installation and maintenance of an on-site business system. SaaS-based expense management has succeeded in changing the procurement of expense management systems from a capital expenditure to a pay-per-use subscription arrangement.

The global SaaS-Based Expense Management top three players include Concur Technologies, SAP Ariba and IBM, with about 66% market shares. North America is the largest consumption place, with a consumption market share nearly 39%.
