According to our (Global Info Research) latest study, the global Sacituzumab Govitecan market size was valued at US\$ 144 million in 2025 and is forecast to a readjusted size of US\$ 639 million by 2032 with a CAGR of 15.6% during review period.

Sacituzumab Govitecan is a Trop β 2-targeted antibody-drug conjugate (ADC) composed of a humanized anti-Trop β 2 monoclonal antibody, a hydrolyzable CL2A linker, and SN β 38, a cytotoxic topoisomerase I inhibitor. The drug specifically binds to the Trop β 2 antigen on the surface of tumor cells, is internalized into cells, and releases the cytotoxic payload to precisely kill tumor cells. It is mainly indicated for the treatment of solid tumors such as metastatic triple-negative breast cancer and metastatic urothelial carcinoma. Featuring strong targeting, high antitumor activity and a wide therapeutic window, it is an important targeted therapeutic agent in the field of advanced solid tumors. In 2025, global Sacituzumab Govitecan (Trodelvy) production reached approximately 1.6 million vials.

Sacituzumab Govitecan, the world's first Trop β 2-targeted antibody-drug conjugate (ADC), occupies an important market position in refractory solid tumors such as triple-negative breast cancer. It has remarkable clinical value and has become the standard second-line treatment for advanced triple-negative breast cancer. It also demonstrates favorable efficacy in HR-positive, HER2-negative breast cancer and urothelial carcinoma. Globally, the drug has been approved in 59 countries and regions. With its unique mechanism of action and excellent clinical data, it continues to drive the expansion of the ADC market. In the domestic market, Sacituzumab Govitecan has been included in many commercial insurance and inclusive medical insurance programs, gradually improving drug accessibility. With the successive launch of

domestic Trop?2 ADCs, market competition has become increasingly fierce. However, its first?mover advantage, clinical recognition and potential for indication expansion still support its market competitiveness. In the future, with the approval of first?line indications, the advancement of combination therapies and accelerated medical insurance access, Sacituzumab Govitecan is expected to further expand its market share and reshape the treatment landscape of solid tumors.
