According to our (Global Info Research) latest study, the global Sacituzumab Tirumotecan market size was valued at US\$ 206 million in 2025 and is forecast to a readjusted size of US\$ 936 million by 2032 with a CAGR of 16.7% during review period.

Sacituzumab Tirumotecan is an antibody?drug conjugate (ADC) targeting trophoblast cell-surface antigen 2 (TROP-2). It consists of a humanized monoclonal antibody, a cleavable linker, and a cytotoxic payload. The antibody component specifically recognizes and binds to the TROP-2 antigen expressed on tumor cells, enabling the targeted delivery of the cytotoxic agent into the cells, where the active component is released to inhibit DNA replication and induce cell death. This drug is mainly used for the targeted treatment of various solid tumors, such as breast cancer and lung cancer. It is characterized by high targeting specificity, strong cytotoxic efficacy, and relatively controllable systemic toxicity, making it an important innovative therapy in the field of antibody?drug conjugates. In 2025, global sacituzumab tirumotecan production reached approximately 1.2 million units.

Sacituzumab Tirumotecan, as a TROP-2-targeting antibody?drug conjugate (ADC), is in a rapid growth phase within the precision oncology market. With the rising incidence of high-prevalence solid tumors such as breast cancer and lung cancer, along with the increasing demand for targeted therapies, this drug is gradually gaining clinical recognition and driving market expansion due to its advantages of ?high targeting specificity and potent cytotoxicity.? Meanwhile, the maturation of ADC technology platforms and supportive policies for innovative drugs have also facilitated its commercialization. However, market competition is intensifying, including from products with the same target (such as Trodelvy) as well as other ADC drugs (such as Enhertu),

which pose direct competitive pressure. Overall, the market for Sacituzumab Tirumotecan represents a ?high-value, fast-growing? segment of innovative therapeutics, with future growth mainly driven by indication expansion, global market development, and continuous validation of clinical data.
