The global Safety-Critical SAST market size is expected to reach \$ 1901 million by 2032, rising at a market growth of 21.2% CAGR during the forecast period (2026-2032).

Safety-Critical SAST is a specialized subset of Static Application Security Testing dedicated to safety-critical systems?software whose failure could lead to catastrophic consequences (loss of life, severe injury, environmental damage, or major financial loss). It performs rigorous, compliance-driven static analysis on source/byte/binary code without execution, focusing on safety flaws, functional failures, and regulatory violations beyond conventional security vulnerabilities. It enforces strict coding standards, traceability, and zero-tolerance for critical defects, tailored for industries like aerospace, medical devices, automotive (ISO 26262), railway, and industrial control.

This report studies the global Safety-Critical SAST demand, key companies, and key regions.
