Abstracts

The global Safety Laser Scanners market size is expected to reach \$ 490 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032).

Safety laser scanners use time-of-flight technology, this means the scanner calculates position based on the time it takes for the laser to bounce off an object and return to the unit. Safety laser scanners are widely used because of their versatility. Safety laser scanners can be mounted vertically or horizontally and cover several types of hazards. These devices offer distinct advantages over conventional guarding options.

In 2023, Europe's global market share is 24.8%, and North America is 22.4%. In the next few years, the important market position of the Asia-Pacific region will become more prominent. In addition to China, Japan and Southeast Asia will also play an important role. In Europe, Germany is expected to continue to maintain its leading position in Europe in the next six years, with a CAGR of approximately 3.8% from 2024 to 2030.

At present, the global high end market is basically dominated by manufacturers in Europe, Japan and the United States. The world's leading manufacturers of Safety Laser Scanners mainly include Keyence, SICK, Omron, Turck Banner, Pilz GmbH, and Pepperl+Fuchs, etc. The top three manufacturers account for approximately 53% of the global market share.
