Abstracts

According to our (Global Info Research) latest study, the global Safety Laser Scanners market size was valued at US\$ 357 million in 2024 and is forecast to a readjusted size of USD 472 million by 2031 with a CAGR of 4.1% during review period.

Safety laser scanners use time-of-flight technology, this means the scanner calculates position based on the time it takes for the laser to bounce off an object and return to the unit. Safety laser scanners are widely used because of their versatility. Safety laser scanners can be mounted vertically or horizontally and cover several types of hazards. These devices offer distinct advantages over conventional guarding options.
