Abstracts

According to our (Global Info Research) latest study, the global Safety and Efficacy Testing for Cosmetics and Hygiene market size was valued at US\$ 1286 million in 2025 and is forecast to a readjusted size of US\$ 2413 million by 2032 with a CAGR of 9.4% during review period.

Safety and Efficacy Testing for Cosmetics and Hygiene is a comprehensive scientific evaluation framework designed to verify the safety, stability, and performance of cosmetics and hygiene products, including personal care and cleaning formulations, through toxicological assessments, physicochemical analysis, microbiological testing, and controlled human trials in accordance with global regulatory standards. It extends beyond traditional cosmetics testing by covering a broader range of hygiene-related applications, ensuring product safety under diverse usage conditions while validating functional claims. Its advantages include high technical barriers, strict regulatory compliance requirements, and the ability to strengthen brand credibility and market acceptance through scientifically validated results. In 2025, the industry's average gross margin was approximately 35%. The upstream sector primarily consists of high-precision testing instruments, laboratory consumables, and chemical reagents, with representative suppliers including Thermo Fisher Scientific, Agilent Technologies, Waters Corporation, and Merck. The midstream focuses on the execution of physicochemical testing, microbiological analysis, toxicological safety assessments, and human efficacy trials to generate authoritative compliance reports. The downstream sector mainly encompasses cosmetics, sunscreen formulations, as well as hygiene and cleaning products, with representative customers including L'Oréal, Procter & Gamble, Estée Lauder, Unilever, and Shanghai Jahwa.

Safety and Efficacy Testing for Cosmetics and Hygiene is entering a structurally expanding phase driven by tightening global regulations, rising consumer awareness, and accelerated product innovation cycles. As brands increasingly differentiate through functional claims such as anti-aging, sensitive-skin compatibility, and microbiome balance, the demand for high-quality clinical validation and standardized testing protocols continues to intensify. At the same time, hygiene-related products, including disinfectants and daily cleaning formulations, are facing stricter safety scrutiny under diverse usage scenarios, further broadening testing scope. From a commercial perspective, service providers with integrated capabilities in toxicology, human trials, and regulatory compliance are better positioned to capture value, particularly as multinational brands seek unified global certification frameworks. In this context, scalability, data credibility, and turnaround efficiency will increasingly determine competitive positioning and profitability.

This report is a detailed and comprehensive analysis for global Safety and Efficacy Testing for Cosmetics and Hygiene market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Safety and Efficacy Testing for Cosmetics and Hygiene market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Safety and Efficacy Testing for Cosmetics and Hygiene market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Safety and Efficacy Testing for Cosmetics and Hygiene market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Safety and Efficacy Testing for Cosmetics and Hygiene market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Safety and Efficacy Testing for Cosmetics and Hygiene

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Safety and Efficacy Testing for Cosmetics and Hygiene market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include SGS SA (Switzerland), Intertek Group Plc (UK), Eurofins Scientific SE (Luxembourg), Bureau Veritas SA (France), UL LLC (USA), Centre Testing International (China), PONY Testing Group Co., Ltd. (China), China Certification & Inspection Group (China), Iwase Cosfa Co., Ltd. (Japan), Dermatest GmbH (Germany), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

Safety and Efficacy Testing for Cosmetics and Hygiene market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Classification of Safety and Efficacy Testing for Cosmetics and Hygiene by Type

1.3.1 Overview: Global Safety and Efficacy Testing for Cosmetics and Hygiene Market Size by Type: 2021 Versus 2025 Versus 2032

1.3.2 Global Safety and Efficacy Testing for Cosmetics and Hygiene Consumption Value Market Share by Type in 2025

1.3.3 Clinical Research Services

1.3.4 Cosmetics Testing to Regulation

1.3.5 Allergen Screening

1.3.6 Microbiology Testing

1.3.7 Ingredients Testing

1.3.8 Others

1.4 Classification of Safety and Efficacy Testing for Cosmetics and Hygiene by Sample Size

1.4.1 Overview: Global Safety and Efficacy Testing for Cosmetics and Hygiene Market Size by Sample Size: 2021 Versus 2025 Versus 2032

1.4.2 Global Safety and Efficacy Testing for Cosmetics and Hygiene Consumption Value Market Share by Sample Size in 2025

1.4.3 n
