According to our (Global Info Research) latest study, the global Safflower Oil market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Safflower oil is a vegetable oil extracted from the seeds of the safflower plant (*Carthamus tinctorius*). It is known for its neutral flavor, light texture, and high smoke point, making it suitable for various culinary applications. Safflower oil contains a balanced composition of polyunsaturated and monounsaturated fats, notably omega-6 fatty acids like linoleic acid. It is also a rich source of vitamin E, which functions as an antioxidant. Safflower oil is commonly used in salad dressings, cooking, baking, and frying due to its mild taste, versatility, and ability to withstand high cooking temperatures.

The industry trend of safflower oil is influenced by the increasing consumer preference for healthier oil options. Safflower oil, with its low saturated fat content and high levels of polyunsaturated fats, including beneficial omega-6 fatty acids, is gaining popularity. This oil is sought after as a healthier alternative to traditional cooking oils such as vegetable or corn oil. Additionally, the rising demand for natural and plant-based products has driven the trend of using safflower oil as an ingredient in various food, cosmetic, and pharmaceutical applications.
