Abstracts

Freezer racks are designed to organize & safely store biological samples and other frozen materials in a laboratory freezer. Built out of stainless steel or aluminum, laboratory freezer racks are a durable, long lasting solution to freezer organization. Freezer racks are designed with separate compartments where you can store individual boxes, conical tubes, vials and other storage materials commonly found in laboratory applications. This allows for easy labeling and identification of samples while providing security. These laboratory freezer racks are typically used to store samples within -20°C Freezers, Ultra Low Temperature Freezers & Cryogenic LN2 freezers.
