Abstracts

A storage area network (SAN) switch is a device that connects servers and shared pools of storage devices and is dedicated to moving storage traffic. The SAN switch contains the Director-class switches and Fibre Channel switches.

Scope of the Report:

This report focuses on the SAN Switches in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Beginning in the late 1990s, FC emerged and widely adopted by the world's leading server and storage systems manufacturers and is now available in 2, 4, 8 and 16 gigabit per second (Gb/s) FC solutions. Its advanced capabilities enabled new architectures such as SAN which connect multiple host computers to one or more storage arrays. One of the key drivers of growth in the SAN market is the "greenfield" deployments in emerging markets, such as BRICS countries, with more pronounced growth mainly in China and India. Government and financial institutions in these regions are also significant contributors to the SAN market's growth.

The worldwide market for SAN Switches is expected to grow at a CAGR of roughly -2.1% over the next five years, will reach 1670 million US\$ in 2023, from 1900 million US\$ in 2017, according to a new GIR (Global Info Research) study.
