Scope of the Report:

This report focuses on the Sand Plant Machine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The sand plant market is witnessing considerable growth due to advancements in technology and high efficiency of sand plant. The sand plant market has immense opportunities as aluminum is preferred over iron and steel products in the automobile industry; moreover, investments in the automobile industry is growing, which will drive the demand for cast products.

On the basis of process, the sand plant machine market is segmented into Conventional Sand Casting and Special Casting. The Conventional Sand Casting is projected to grow at the highest CAGR during the forecast period. The dominant market position of the conventional sand casting segment can be attributed to the excellent efficiency and the economical nature of the process that offers a broader range of shapes and components than other casting techniques. Die casting is extensively used in the automobile sector for parts such as engine blocks, wheel spacers, and valve covers. In terms of value, the Clay sand segment, by end-use, is projected to grow at the highest rate during the forecast period. This growth is attributed to the growing demand

for automobiles globally.

Asia Pacific is a significant iron & steel casting market due to robust industrialization in countries like China and India. Fast developing infrastructure and construction industry in this region will be a major factor resulting in increase in the market share in Asia Pacific. Europe and North America also have substantial share of the iron & steel casting market due to growth of construction industry and presence of manufacturing companies in the U.S. and eastern European nations like Germany and France. Latin America and Middle East iron & steel casting market will also experience a steady growth due to improving economic condition in these regions leading to a rise in manufacturing as well as construction activities.
