Arc valve is a type of valve that typically refers to a valve with an arc-shaped or curved design. This design is common in some specific fluid control systems, especially in environments where liquid or gas flow needs to be controlled and space is limited. Arc valves can provide smoother fluid channels, reduce fluid resistance, and to some extent improve flow efficiency. Arc valve is a valve with high cleanliness and hygiene design, which can be used in pipeline cleaning systems, as well as for cutting off, reversing or complex process pipeline systems. Widely used in fields such as food, beverage, brewing, pharmaceuticals, and chemical industries.
