SAP S/4HANA is the shorter form of SAP Business Suite 4 SAP HANA, which means it is the fourth version of SAP Business Suite. It is designed to run only on SAP HANA. The transition of SAP users to SAP S/4HANA is similar to the earlier transition from the ERP versions, SAP R/2 to SAP R/3.

The next generation Business Suite of SAP is SAP S/4HANA which is designed in a simplified way specifically to work with SAP HANA and to replace the SAP ECC/ERP.

SAP S/4HANA is the in-memory version of the Business Suite ERP platform. SAP S/4HANA was announced in February 2015 and billed as SAP's "most important release in 23 years", S/4HANA is intended to be easier to use and administer by helping to solve more complex problems and handle vastly larger amounts of data than its predecessors. S/4HANA is available in on-premises, cloud and hybrid deployment models.

As per the SAP, developers feel the changes in SAP as they find ERP system is more agile, simpler to understand and use. This change is termed as the opportunity for businesses to reinvent business models and re-generate revenues with the advantage of the Internet of Things (IoT) and big data by connecting people business networks and devices by the SAP.

As per the SAP, Batch processing is not required for S/4HANA this makes the businesses to simplify their processes and drive them in real time which mean that the business user can access insight on data from anywhere in real time for prediction, execution, planning and simulation.
