Abstracts

According to our (Global Info Research) latest study, the global SAS Switches market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The SAS Switch is the industry's first whole cabinet-level storage pool node. It separates storage resources into independent pools, and the ratio of computing resources to storage resources is no longer a fixed value. For different applications, only the amount of storage resources controlled by the computing node needs to be flexibly adjusted. This architecture may revolutionize traditional server architectures in the future.
