According to our (Global Info Research) latest study, the global Satellite Based Augmentation Systems (SBAS) market size was valued at USD 606.1 million in 2023 and is forecast to a readjusted size of USD 835.3 million by 2030 with a CAGR of 4.7% during review period.

SBAS systems are geosynchronous satellite systems that provide services for improving the accuracy, integrity and availability of basic SBAS signals. Accuracy is enhanced through the transmission of wide-area corrections for SBAS range errors. Integrity is enhanced by the SBAS network quickly detecting satellite signal errors and sending alerts to receivers that they should not track the failed satellite. Signal availability can be improved if the SBAS transmits ranging signals from its satellites. SBAS systems include reference stations, master stations, uplink stations and geosynchronous satellites.

Global Satellite Based Augmentation Systems (SBAS) key players include Thales, Raytheon Company, Mitsubishi, Airbus, SES, etc. Global top five manufacturers hold a share about 80%.
