According to our (Global Info Research) latest study, the global Satellite Flexo Printing Machines market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Satellite Flexo Printing Machine is also known as shared impression cylinder flexo printing machine. The printing units are mounted between two wall panels around a common impression cylinder. The printing material is printed in color around a common impression cylinder. Because the gears are directly driven, no matter it is paper or film, even if no special control device is installed, it can still be overprinted accurately, and the printing process is stable. It is often used to print color products.
