Saw blades are tools that are used for cutting and shaping materials like wood, metal, stone, tiles, concrete, etc. A saw blade consists of a blade, chain, or toothed edges that facilitate smooth cutting. Saw blades come in different types and design, specific for the material it is used on. Some of the commonly used saw blades are stone cutting, circular, band, hand, chain, and straight saw blades. Saw blades are used for applications in industries such as lumbering, furniture, construction, automotive, mining, etc.

Stone cutting saw blades are used to cut and shape thick materials like granite, marble, sandstone, concrete, ceramic tiles, glass, and hard stone. The construction industry increasingly uses these materials. The demand for stone cutting saw blades will increase during the predicted period due to growth in the commercial and residential construction. The growth opportunities for manufacturers in the circular saw blades market is increasing due to the rising innovations in building design and the increased focus on efficient energy framework for structures.
