## Abstracts

According to our (Global Info Research) latest study, the global SBQ (Special Bar Quality) Steel market size was valued at USD 27890 million in 2023 and is forecast to a readjusted size of USD 34580 million by 2030 with a CAGR of 3.1% during review period.

Special bar quality (SBQ) steels can be defined as those, which are developed for challenging and high stress applications. Thus, these steels stand out different & tall among a diversity of grades that are in use in the enterprising processes. The SBQ steels have thus emerged as the mandatory requirements in various applications like those defined by high speed machining, high stress and high tensile strength among other finer attributes of engineering and metallurgy. The SBQ steels are today offered by manufacturers in the form of stainless steel bar, steel Hexagons, flats, tubes and other products of demand and relevance in manufacturing economy. These are mostly used in the development of bearings, high speed shafts, gears and other vital products that have to be resistant to the metal fatigue through prolonged and continuous use as moving parts in machineries/automobiles.

The key players of SBQ (special bar quality) Steel include CITIC, Nucor Corporation, ICH, etc. The top 2 players account for approximately 43% of the total market. In terms of type, rounds is the largest segment, with a share about 60%. And in terms of application, the largest application is automotive industry, followed by transportation industry.
