According to our (Global Info Research) latest study, the global SCADA in Process Industries market size was valued at USD 3358.5 million in 2023 and is forecast to a readjusted size of USD 4425.3 million by 2030 with a CAGR of 4.0% during review period.

SCADA is an automation system that helps to acquire data from remote devices, such as transmitters, pumps, and valves, installed in the field.

The oil and gas segment led the market during 2017, accounting for a market share of more than 20%. As plants in the oil and gas industry cover a vast area, SCADA system monitors and controls remote units by integrating outstations with the control system of the entire plant. It visualizes and operates processes, production flows, and machines in oil and gas plants. Numerous oil and gas companies are integrating SCADA solutions with their enterprise resource planning (ERP) and manufacturing execution system (MES) frameworks, which require continuous maintenance and support from the automation vendors. This will give more opportunities for vendors to enhance their revenue.
