According to our (Global Info Research) latest study, the global Scale Plate Conveyor market size was valued at US\$ 203 million in 2024 and is forecast to a readjusted size of USD 262 million by 2031 with a CAGR of 3.7% during review period.

The scale plate conveyor is a general-purpose fixed conveying equipment, which uses circulating chains or rollers as traction components and steel plates as carrier troughs. It can be used to convey a large number of bulk materials and single heavy objects. It has large traction, good trough plate rigidity, and impact resistance. It is suitable for conveying hot, large-grained, abrasive, heavy castings and forgings and other bulk materials or finished items. It can convey various bulk materials and finished items horizontally or obliquely, and can also be used to transport finished items in assembly lines. It can also convey high-temperature materials of about 600°.
