Abstracts

According to our (Global Info Research) latest study, the global Scenic Spot Development and Management Service market size was valued at US\$ 4030 million in 2025 and is forecast to a readjusted size of US\$ 6921 million by 2032 with a CAGR of 8.0% during review period.

Scenic spot development and management services refer to professional services that provide all-round support for the planning, construction, operation and maintenance of tourist attractions. The services cover scenic spot resource assessment, project planning, infrastructure construction, visitor management, marketing, environmental protection and other aspects, aiming to enhance the sustainable development capacity and economic benefits of scenic spots. Through scientific development and refined management, we ensure the rational use of scenic spot resources, enhance the visitor experience, and promote the coordinated development of local economy, culture and ecology.

The value chain of scenic area development and management services typically includes multiple stages: resource acquisition and planning and design, infrastructure construction and investment, on-site operation and management, supporting commercial development, marketing and distribution channels, and tourist services. The upstream segment involves the revitalization of scenic resources, overall planning and design, environmental assessment, and infrastructure construction contractors, responsible for scenic area positioning, route planning, and transportation and public facilities construction. The midstream segment comprises scenic area operators and managers, including daily operations, safety assurance, facility maintenance, ticketing systems, and brand promotion, forming the core of the entire chain. The downstream

segment encompasses catering and accommodation, cultural performances, tourism e-commerce platforms, related derivative products, and experiential activities, directly creating consumption scenarios and revenue for tourists. The entire value chain involves both traditional tourism services and the integration of digital ticketing, cultural tourism products, and secondary consumption projects, driving the transformation of scenic areas from a 'ticket economy' to a 'tourism experience economy.' The gross profit margin of the main business of scenic areas (such as tickets, guided tours, safety, and facility services) typically fluctuates between 20% and 70%, depending on the type of scenic area and the services offered: for example, high-value-added facilities such as cable cars can have gross profit margins of 43%–89%, core scenic area services have a gross profit margin of approximately 35%–70%, while supporting services such as those provided by travel agencies have a lower gross profit margin of only about 5%–10%. Overall, scenic area development and management services have significant profit margins and growth potential by strengthening operational efficiency, increasing derivative consumption, and optimizing resource utilization.

The key to the success of scenic spot development and management services lies in achieving a balance between resource protection and commercial development. Scientific planning and sustainable development concepts should be integrated throughout the entire scenic spot development process to ensure that natural resources and cultural heritage are effectively protected while enhancing the scenic spot's attractiveness and tourist experience. In addition, the application of smart tourism technologies, such as big data analysis, smart guides, and tourist behavior monitoring, can also help optimize scenic spot management and services and improve operational efficiency. However, the over-commercialization of scenic spots and environmental pressures remain challenges, and it is necessary to focus on ecological protection and community interests during the development process to ensure the long-term and healthy development of scenic spots.

This report is a detailed and comprehensive analysis for global Scenic Spot Development and Management Service market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Scenic Spot Development and Management Service market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Scenic Spot Development and Management Service market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Scenic Spot Development and Management Service market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Scenic Spot Development and Management Service market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Scenic Spot Development and Management Service

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Scenic Spot Development and Management Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include International Theme Park Services, China Tourism Group, Chimelong Group, Songcheng Group, The Producers Group, Fosun Tourism Group, Guilin Tourism Corporation, Merlin Entertainments, The Walt Disney Company, Parques Reunidos, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

Scenic Spot Development and Management Service market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application.
