The global School ERP Software market size is expected to reach \$ 239 million by 2032, rising at a market growth of 8.8% CAGR during the forecast period (2026-2032).

School enterprise resource planning software is an integrated management software platform designed for various types of schools, including kindergartens, primary and secondary schools, vocational schools, and universities, with the core of full-process operation and management of educational institutions. Based on the ERP (Enterprise Resource Planning) concept, it digitizes and integrates core resources such as personnel, finance, materials, teaching, learning, research, enrollment, and examinations with business processes. This achieves data interoperability, closed-loop processes, a unified entry point, and centralized control, replacing fragmented independent systems and improving school management efficiency, decision-making capabilities, and standardization. Ultimately, it enables digital, intensive, and intelligent management of school operations.
