The global Sclerotium Gum market size is expected to reach \$ 11 million by 2029, rising at a market growth of 2.8% CAGR during the forecast period (2023-2029).

The global key manufacturers of sclerotium gum include Cargill, BASF, Alban Muller International, Taiwan Yuzhi and Huaxi Bio. The top three producers together account for more than 80% of the market share, with the largest producer being Cargill, accounting for 35%. Global origins are mainly located in the United States, Europe and China. In terms of product categories, sclerotium gum is divided into liquid and powder, with the former holding a larger market share at 52%. In terms of application, skin care is the number one application with 80% market share, followed by hair care with 14%.

Sclerotium gum is a naturally derived, gel-like polysaccharide (sugar-based) ingredient. It is produced from the fermentation of *Sclerotium rolfsii*, a type of fungus that gives it its name. Sclerotium gum is used in cosmetics to thicken and stabilize formulas. It also functions as a skin conditioning agent.

Sclerotium gum is used as a natural alternative to synthetic gelling agents such as carbomer. It also works as a suspending agent, literally keeping heavier ingredients in a formula from sinking to the bottom and requiring a product to be shaken vigorously before each use.

This report studies the global Sclerotium Gum production, demand, key manufacturers, and key regions.
