## Abstracts

The global SCR Copper Rod market size is expected to reach \$ 166069 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

In 2025, global SCR Copper Rod production reached approximately 15 million Tons, with an average global market price of around US\$ 8207 per Ton.

Southwire Continuous Rod (SCR) Copper Rod refers to copper rod produced by Southwire's SCR? continuous casting and rolling process. In practice, it usually means electrolytic tough pitch (ETP) copper wire rod made in a continuous process from molten copper and used as the main feedstock for manufacturing wire, cable, and grounding products.

SCR Copper Rod is not a different copper chemistry by itself; it is mainly a process-defined copper rod product associated with Southwire's continuous rod manufacturing technology. Southwire describes SCR? as an advanced process for the continuous production of copper rod, and notes that its SCR systems produce ETP copper rod for electrical applications because of copper's high conductivity. It is widely used in the wire and cable industry as a standard upstream material.

This report studies the global SCR Copper Rod production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for SCR Copper Rod and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
