Southwire Continuous Rod (SCR) Copper Rod refers to copper rod produced by Southwire's SCR? continuous casting and rolling process. In practice, it usually means electrolytic tough pitch (ETP) copper wire rod made in a continuous process from molten copper and used as the main feedstock for manufacturing wire, cable, and grounding products.

SCR Copper Rod is not a different copper chemistry by itself; it is mainly a process-defined copper rod product associated with Southwire's continuous rod manufacturing technology. Southwire describes SCR? as an advanced process for the continuous production of copper rod, and notes that its SCR systems produce ETP copper rod for electrical applications because of copper's high conductivity. It is widely used in the wire and cable industry as a standard upstream material.
