According to our (Global Info Research) latest study, the global SCR Power Regulator market size was valued at USD 216.7 million in 2023 and is forecast to a readjusted size of USD 345.8 million by 2030 with a CAGR of 6.9% during review period.

An SCR (Silicon Controlled Rectifier) power regulator, also known as an SCR power controller, is an electronic device that is used to control the amount of power that is supplied to a load (such as a heater or motor) in an AC (alternating current) circuit. The Thyristor Power Regulator is based on a solid-state switching device called an SCR, which can control the flow of current in a circuit.

At present, it has been widely used in various electric power equipment in the industry, such as kilns, heat treatment furnaces, electric high-temperature furnaces, and synthetic electric furnaces. Because of different loads and different use environments, choose different control modes: phase control, distributed zero potential control, and time-proportional adjustable control.

Advanced Energy, Watlow and Sichuan Injet Electric are the world's key manufacturers of SCR power regulators, with a combined market share of more than 25%. The Asia-Pacific region is the largest consumer market with over 50% market share, followed by Europe and North America with about 20 percent and 18 percent, respectively.
