Abstracts

A screen protector is a layer of protective film to avoid scratches, wear, or contamination on the screen surface of an electronic product. Now screen protectors are widely used for mobile phones, tablets, laptops, LCD TVs, handheld video game devices, cameras, GPS unit, e-book readers and other electronic items. Especially after the emergence of intelligent mobile phone, screen protector has been widely used.

Scope of the Report:

This report focuses on the Screen Protector in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The prices of Screen Protector will continue to decline. Screen Protector's business competition and the gradually falling prices of Screen Protector raw materials prompted the Screen Protector prices to continue to decline.

Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Although sales of Screen Protector brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk the enter this market.

The worldwide market for Screen Protector is expected to grow at a CAGR of roughly 14.0% over the next five years, will reach 3970 million US\$ in 2023, from 1810 million US\$ in 2017, according to a new GIR (Global Info Research) study.
