Abstracts

According to our (Global Info Research) latest study, the global Screenless Smart Bracelet market size was valued at US\$ 1210 million in 2025 and is forecast to a readjusted size of US\$ 2201 million by 2032 with a CAGR of 8.9% during review period.

In 2025, global sales of screenless smart bracelets reached 42 million units, with an average selling price of \$28 per unit. Screenless smart bracelets are wearable health monitoring devices without a display screen, characterized by lightweight design and long battery life. They primarily use built-in sensors to continuously collect data such as heart rate, blood oxygen, sleep, steps, and activity levels, and connect to a mobile app via Bluetooth for data synchronization and analysis. These products typically consist of a main control chip, photoelectric sensor module, battery, Bluetooth communication module, and flexible wristband. They are characterized by small size, light weight, comfortable wear, and long battery life, making them suitable for daily health management, sports monitoring, and corporate employee health management. The industry's total production capacity is approximately 60 million units per year, with an average gross profit margin of approximately 27%. Upstream raw materials mainly include MCU chips, optical sensors, lithium batteries, Bluetooth modules, and silicone or TPU wristbands. Downstream demand is primarily driven by the personal consumer market, corporate health management and insurance applications, medical auxiliary monitoring, and sports and fitness institutions. With the increasing awareness of health management and the popularization of low-power IoT devices, screenless smart bracelets continue to penetrate the entry-level wearable market due to their low cost and long battery life. In the future, they will develop towards high-precision sensing, data service platformization, and medical-grade monitoring, and have a continuously growing demand and business opportunities in the fields of digital health and remote

monitoring.
