## Abstracts

The global Screw Press market size is expected to reach \$ 276 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

A screw press is a type of machine press in which the ram is driven up and down by a screw. The screw shaft can be driven by a handle or a wheel. It works by using a coarse screw to convert the rotation of the handle or drive-wheel into a small downward movement of greater force. The overhead handle usually incorporates balls as flyweights. The weights helps to maintain the momentum and thrust of the tool to make it easier to operate.

Global Screw Press key players include FKC, ANDRITZ, Ishigaki Company, Haarslev, etc. Global top four manufacturers hold a share about 35%.

North America is the largest market, with a share about 25%, followed by Europe and China, both have a share over 40 percent.

In terms of product, Single Screw Press is the largest segment, with a share about 83%. And in terms of application, the largest application is Municipal Sludge Treatment, followed by Industrial Waste Treatment, Paper Mills, Water Treatment, etc.

This report studies the global Screw Press production, demand, key manufacturers, and key regions.
