The global Scrubber-Dryers market size is expected to reach \$ 2476 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Scrubber dryer is a device used to clean the floor. The basic scrubber dryer was introduced in the 1920s. The modern scrubber dryer, which is also referring automatic scrubber dryer, was not invented until the middle of the 20th century. It uses a system that generally involves spraying the floor with a combination of cleaning chemicals and water, scrubbing the floor to break up spill, residue and dirt, and then a squeegee-vacuum combination that absorbs the used water, leaving the floor completely dry and clean. Now, scrubber dryers are widely used in these public places like supermarkets and modern malls.

Globally, the scrubber-dryers industry market is not very concentrated as the manufacturing technology of scrubber-dryers is relatively matures than some high-tech equipment. And some enterprises, like Tennant, Nilfisk, Karcher and Hako etc. are well-known for the wonderful performance of their scrubber-dryers and related services.
