Sealants for food cans are specialized adhesives engineered for hermetic sealing of metal or glass food containers, ensuring leak-proof and oxygen-barrier properties. Formulated with FDA-compliant materials (e.g., epoxy, silicone, or polyurethane), they withstand high-temperature sterilization (>121°C), resist chemical corrosion (acids/oils), and exhibit low migration to prevent food contamination. Applications include side-seam sealing, double-seam coating, and pull-tab liner bonding, critical for preserving shelf life. Eco-friendly water-based variants dominate modern production, with advanced options featuring fluorescent tracers for automated quality inspection.
