SCOPE OF THE REPORT:

This report focuses on the Sealed Lead-Acid Batteries in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. During 2017, the AGM segment accounted for the major shares of this market. The ability of AGM batteries to supply high currents on demand, provide a long or relatively long service life, and its low internal resistance, will contribute to the growth of this market segment.

This market study estimates that in terms of geographic regions, APAC will be the major revenue contributor to the market by 2023. This is mainly due to the rapid increase in rural subscribers and the increasing smartphone penetration throughout the region. Additionally, the growing need to overcome high energy costs due to the use of diesel generators in telecom towers that is driving telecom operators to opt for green and hybrid solutions, will also drive the growth of the sealed lead-acid batteries market.

The worldwide market for Sealed Lead-Acid Batteries is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
