Abstracts

The global Secondary Containment Liner market size is expected to reach \$ 1759 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Secondary containment liner is a flexible anti-seepage protective membrane material specially designed to prevent liquid leakage and environmental contamination. It is laid beneath storage tanks, waste pits and liquid holding facilities, capable of intercepting leaked oil, chemical solvents and wastewater effectively. This durable lining material forms a secondary safety barrier, avoiding soil and underground water pollution and securing safe operation of industrial liquid storage systems.

In 2025, global Secondary Containment Liner production reached approximately 196,923 K Sqm, with an average global market price of around US\$ 6.5 per Sqm.

Upstream suppliers deliver basic raw materials including high polymer resin, reinforcing base material, chemical additives and sealing accessories. Midstream manufacturers conduct material blending, extrusion forming, cutting processing, composite lamination and quality performance inspection. Downstream links connect environmental engineering contractors, facility maintenance service providers and industrial operation enterprises, and finished liners are installed inside containment facilities to serve anti-leakage protection scenarios in various industrial fields.

Raw material procurement cost of polymer and auxiliary materials takes the largest proportion of total expenditure. Manufacturing costs cover production energy consumption, mechanical equipment depreciation and manual processing wages. Additional expenses include product cutting packaging, anti-corrosion performance

testing, warehouse storage and freight distribution. Technical certification fees, daily operational management and on-site installation supporting service costs also constitute indispensable parts of overall product cost.

This report studies the global Secondary Containment Liner production, demand, key manufacturers, and key regions.
